EBP 106 EU

EBUS BUTTON PANEL - FLEX55 AND EU WALL FRAME

The Extron EBP 106 EU eBUS® Button Panel is a fully-customizable AV system control interface designed for use with Extron eBUS-enabled control systems. This easy-to-use control panel connects to an IPCP Pro control processor to perform a wide variety of AV system functions. Six backlit, soft-touch buttons provide easy operation in low-light environments. eBUS button panels are linked to the control processor and to each other using a single cable that carries both power and communication.

- Fully customizable button panel integrates easily with an Extron Pro Series control system
- Compatible with Flex55 modules, mounting kits, and enclosures or EU junction boxes
- Six backlit, soft-touch buttons that can be customized using Extron's Custom Button Builder
- Two eBUS ports allow for quick system expansion and upgrades
- Use a single button panel or combine multiple button panels to accommodate a broad variety of system designs
- DIP switches are used to set unique eBUS device addresses and minimize setup time
- Includes black and white EU wall frames and mounting bracket

DESCRIPTION

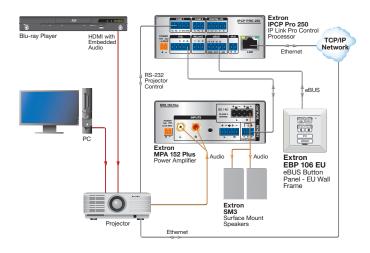

eBUS button panels connect using a unique digital bus architecture that allows for easy control system expansion, greater design options, and future upgrades. Button panels are linked to the control processor and to each other using a single cable that carries both power and communication. This efficient, expandable design allows a button panel to be used as a single user interface in a smaller system or combined with other button panels and touchpanels when a more elaborate control system is required.

Since eBUS button panels have the same physical appearance as Extron's broad range of MediaLink controllers, they can be used alongside them throughout a facility while preserving a consistent look and user experience. Button panels are available with five to ten buttons with convenient button arrangements to suit a broad range of room control needs. Buttons can be easily customized using the online Custom Button Builder application.

FEATURES

- Fully customizable button panel integrates easily with an Extron Pro Series control system
- Compatible with Flex55 modules, mounting kits, and enclosures or EU junction boxes
- Six backlit, soft-touch buttons that can be customized using Extron's Custom Button Builder
- Two eBUS ports allow for quick system expansion and upgrades
