# Ultra-Wide Displays

#### 21:9 5K LCD

**PANA** 105 & 81

udn

# WHY 21:9?

"Going into displays is a natural progression for Jupiter because our processors manage the displays," Sidney Rittenberg Jr, CEO of Jupiter . "But we wanted to do something different." So the concept for a 21:9 screen was born—or reborn.

Pana's 21:9 ultra-wide 5K native resolution brings a refreshing form factor to the conventional display market. Our 8-foot wide Pana 105 canvas optimizes team productivity allowing for improved interaction and work place collaboration. Pana provides 33% more pixels with 5K resolution giving the user more real estate in which to work. Whether you are viewing the immersive Pana 105 or expansive Pan 81, the form factor of each Pana is inspired by our natural human ability to see wider than we see taller.

. . . . .

A more spacious display ensures more pertinent information gets placed in our panoramic visual sweet spot, increasing our comprehension and productivity.

# **Microsoft Teams** Front Row ready

Due to its 21:9 format, Microsoft now recommends using this aspect ratio for an enhanced meeting rooms' configuration when using Teams.

The large single display perfectly shows the Front Row mode workflow and brings a completely new immersive experience and allows ease of interaction for all participants.

## **Best in class for Enterprise** collaboration and critical data visualization

Crystal clear 5K LCD display USB-C hub with charging Portrait or landscape Direct-bonding touch for Pana 105 Metal-mesh capacitive for Pana 81 SimpleShare<sup>®</sup> collaboration software enabled

# **Tailored for** synergies

Jupiter video processors are 5K compatible and are best suited to drive our displays.

Canvas<sup>®</sup> enabled processors allow seamless management of content and access—the perfect combination for secure installations.
